"We had a fabulous time with our live transmission of Lickhill radio over 8 days in September". "We achieved a far greater number of Literacy targets than I could have imagined and engaged the whole community in a way that we had not expected".

Calne Edginton-White
 Headteacher, Lickhill Primary School

"My school in Bridlington has used a small studio package for over two years now and to date it has far exceeded our wildest expectations. The children use the radio station daily, not only around school and playground, they also stream live onto the internet. They all thoroughly enjoy using the station, which has now become second nature. Children as young as Year 3, now schedule and broadcast programmes from it".

Martin Colman
 NPL Rockin Radio, Bridlington Primary School

We Also Supply Systems To More Than 300 Community & Commercial Radio Stations Including:

Talksport
 Guardian Media Group
 UTV
 Bauer Radio Group
 BBC & BBC World Service
 Global Radio Group

Ministry Of Sound
 ASDA FM
 Abu Dhabi Media Company
 JRG Group Norway
 Town & Country Radio
 Plus Hundreds More...

Visit www.schoolradio.co.uk for lesson ideas and free resources.

Myriad Software Suite

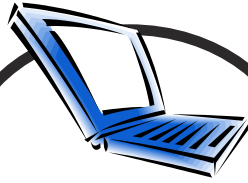

Included In All Our School Radio Packages:

Myriad is used in more radio stations in the UK than any other radio software. From small community radio to national broadcasters, stations around the world rely on Myriad for all their broadcast software needs.

All of our exclusive School Radio Packages includes more than £7000 worth of Myriad software and offers all the tools and facilities you need to run a full time radio station. What's more, because the software we supply isn't restricted or simplified, your students will be using **the exact same tools that we supply to the broadcast industry.**

Broadcast Methods

School Network

You can stream live and pre-recorded programs around your school network to computers, interactive whiteboards and other audio enabled devices within your school network.

Speakers

The traditional method for distributing school radio is via speakers in key areas like the canteen and playground. Ask us about how your IT network can deliver audio to speakers in your school.

Web Streaming

You can stream live or pre-recorded content to listeners around the world using web streaming technology.

All packages come with 12 months free web streaming.

FM & AM Radio

Nothing beats the thrill of broadcasting on the radio. Schools can opt for short term FM (RSL's) or longer term AM broadcasts. We offer a range of transmission equipment to hire or buy.

Podcasting

You can upload recorded shows to your school website as podcasts. All our studio packages include the Podcast Creator tool to help you create and upload your content.

The School Radio Range

A range of contemporary radio studio packages designed to combine traditional radio studios with practical, modern designs ideally suited to the school radio environment

£5799 installed

+ VAT

The SR1 - Table Top Studio

The SR1 is our entry level School Radio studio. It includes all the essential equipment you need to launch your radio station including an SRM mixer and the full Myriad software suite.

The SR1 can be quickly and simply installed on any table top and comes complete with a locking lid making it practical, secure and flexible. As with all of our studios, the SR1 includes onsite installation & training.

The SR2 - Portable Studio

The SR2 is our fully portable School Radio studio. A fully equipped studio package that is housed in tough ABS flight cases which can be packed away for storage or moving around in the back of a standard family car.

Whilst the SR2 is portable, connecting it all together is simple with a setup time of around 10 minutes. The package includes all the equipment you need to launch your radio station without being tied to one place.

£6399 installed

+ VAT

The SR3 - Portable Plus Studio

The SR3 is our best selling studio package. It combines the simplicity of a fixed studio installation with the flexibility of a portable solution to provide your school with the best of both worlds.

The unique SR3 is a fully self contained radio studio. Wheel in, lift the lid, switch on and you are ready to rock. When you have finished, all equipment can be locked in the included drawers for convenience & security.

£7499 installed

+ VAT

The SR4 - Fixed Studio

The SR4 is a modern, fixed School Radio studio ideal for any school that wants to create a dedicated space for their radio station. The contemporary design efficiently provides full radio studio facilities with a small footprint.

Featuring an SRM mixer, four microphones, MP3 players and recorder and of course a touch screen enabled Myriad system, this stylish solution will look at home in any school.

£7499 installed

+ VAT

The Traditional Radio Range

The Traditional Radio range offers a more traditional radio studio whilst still focussing on the needs of School Radio projects.

The TR1 & DR1 - Medium Studios

The TR1 is a more traditional radio studio featuring substantial 'ash' effect woodwork with top and bottom equipment pods.

The major difference between the TR and SR studio ranges is that the TR1 includes a choice of either analogue or digital mixing desks. Select either the Sonifex S2 (TR1) modular analogue mixing desk or the Axia Radius (DR1) digital mixer at no extra cost. Either option offers a great studio package with a big impact.

£9999 installed

+ VAT

The TR2 & DR2 - Large Studios

The TR2 is our largest studio package incorporating impressive 'L' shaped traditional studio furniture, upgraded microphones, additional audio equipment and a choice of professional mixing desks.

Analogue or digital? Choose between a modular Sonifex S2 (TR2) analogue mixing desk or a cutting edge Axia Radius (DR2) digital mixer. Both are great professional options for a commercial radio style School Radio studio.

£12999 installed

+ VAT

The Accessibility Studio

The accessibility studio offers a range of features to improve access for presenters with special educational needs.

The AR1 - Accessibility Studio

The AR1 has been developed in conjunction with a number of schools catering for pupils with special educational needs. This unique School Radio studio includes a number of features designed to maximise access for presenters with a range of physical special needs.

These include a height adjustable desk for wheelchair access, a tilt mechanism for the mixer, touch screen interface and general switch interface to allow Myriad to operate in Scan/Switch mode. This allows control via a number of specialist switch solutions.

£8499 installed

+ VAT

The SR1 - Table Top Studio

Mixer & PC enclosure comes complete with locking lid for security.

The SR1 is our entry level School Radio studio package. It contains all the audio equipment and software that you will need to launch your School Radio station and because it is a Table Top studio, you can install it in minutes just about anywhere.

Package Includes:

- SRM 9 x Dual Channel Audio Mixer
 - 3 x Myriad Software Licences
 - Table Top Mixer Enclosure (choice of colours)
 - Rackmount PC & Multi Channel Soundcard
 - 22" Wide Screen Monitor
 - K500 Myriad Control Keyboard
 - Built In Telephone Interface*
 - 2 x Microphones With Desktop Mic Stands
 - 2 x Headphones
 - Stereo Powered Speakers
 - Table Top 'Mic Live' Light
 - On Site Delivery**, Installation & Training
 - Two Years Office Hours Support
 - 12 Months Free Web Streaming
- (PPL and PRS Licenses may be required)

Key Features:

- Table top studio solution
- Unique locking mixer & pc enclosure
- Very simple setup
- Full Myriad software suite
- K500 Myriad keyboard
- 2 x Mics & 'Mic Live' light
- Ideal for schools short on space

The TR1 - Medium Analogue Studio

The TR1 Studio Package offers a great balance of professional equipment, impact and value for money. At the heart of the package is an S2 professional, expandable mixing desk as found in many of the UK's leading radio stations.

The Medium Studio Package also features enhanced studio woodwork which offers more space, greater flexibility and a much bigger visual impact. The package also includes a wide touch screen, Myriad playout system, mic's, dual MP3 players and everything else you need, all installed and ready to use at your school.

Package Includes:

- Professional Myriad Software Suite
- Sonifex S2 Professional Mixing Desk
- Extended 'straight' Studio Woodwork
- Top And Bottom Wooden Equipment Pods
- Playout PC & 22" Wide Screen Monitor
- 2 x Upgraded Microphones And Mic Arms
- 2 x Studio Headphones
- Dual MP3 Players & Powered Speakers
- Solid State MP3 Recorder
- Table Top Mic Live Light & Studio Clock
- Myriad K500 Keyboard

- MP3 Recorder & dual 'DJ' MP3 player
- Traditional radio studio design

RRP £16,173 + VAT

School Radio Price

£9999^{+VAT}

Inc: delivery, setup & training

The DR1 - Medium Digital Studio

The DR1 is exactly the same specification as the TR1 (see above) except that the S2 mixer is replaced with a cutting edge Axia Radius fully digital mixer. The Axia Radius is a truly digital mixer using Livewire AudioIP to route audio sources and to connect to the Myriad playout software. Some 'digital' desks claim to be digital because they have a sound card built in but the Axia is a true digital desk in every sense of the word. Any source can be routed to any fader at the touch of a button and if you have multiple studios, they can be connected over a standard CAT6 network cable.

Complete DR1 Digital Studio

£9999^{+VAT}

Inc: delivery, setup & training

The TR2 - Large Analogue Studio

This full broadcast studio package comes complete with all the equipment you need to create the perfect broadcast radio environment.

Incorporating substantial 'L' shaped studio woodwork, a choice of professional mixing desks and a full Myriad playout system, this package provides a commercial radio specification at community radio prices.

If you are looking to provide a professional radio studio environment with a visual 'wow' factor then the Large Studio Package is the solution for you.

Package Includes:

- Professional Myriad Software Suite
 - Sonifex S2 Professional Mixing Desk
 - Large 'L' Shaped Studio Woodwork
 - Top And Bottom Wooden Equipment Pods
 - Playout PC & 22" Wide Touch Screens
 - 3 x Upgraded Microphones And Mic Arms
 - 3 x Headphones & 1 x Powered Speakers
 - Dual MP3 Player & Solid State MP3 Recorder
 - 2 x Mic Live Light Plus 'phone Active' Light
 - Myriad K500 Keyboard & Radio Clock
 - Telephone Interface & Handset**
 - Entry Level Audio Limiting & Processor
 - 12 Months Streaming Capacity
 - On Site Delivery**, Installation & Training
 - Two Years Office Hours Support
 - 12 Months Free Web Streaming
- (PPL and PRS Licenses may be required)

Key Features:

- High Impact Studio Installation
- Full Myriad software suite
- Choice Of Analogue Or Digital Mixers
- 22" Touch screen
- K500 Myriad keyboard
- 3 x Mics & 'Mic Live' light
- MP3 Recorder & dual 'DJ' MP3 player
- Traditional radio studio design

The AR1 - Accessibility Studio

The Accessibility Studio was developed in conjunction with a number of special schools around the UK to provide a School Radio studio package that would be accessible to students with varied levels of special educational needs.

The SEN Accessibility Studio features a number of unique features such as a height adjustable desktop, tilt mech mixer, large touchscreen and switch/scan interface for controlling Myriad via standard switch inputs.

Package Includes:

- SRM 9 x Dual Channel Audio Mixer (with tilt)
- 3 x Myriad Software Licences
- Height Adjustable Studio Furniture
- Rackmount PC & Multi Channel Soundcard
- 22" Wide Touch Screen Monitor
- K500 Myriad Control Keyboard
- Built In Telephone Interface*

- 1 x AutoTrack music scheduling software
- 1 x Advert manager advert scheduling software
- 3 x Podcast creator software modules
- 3 x Myriad audio editing modules
- 1 x OCP + more

What Does It All Do?

Microphones

Presenter and guest mic's allow you and your guests to present your show.

Mixing Desk

The mixing desk is the heart of the radio studio. All the songs, jingles and microphones are played through the mixing desk and 'faders' on the desk are used to mix all the audio together. Put the fader up on the Myriad 1 channel and whatever is playing on Myriad Cart Player 1 goes out on air!

MP3 Player & Recorder

IPlay MP3's directly from a memory card or USB stick and record shows to the same device.

Mic Live Light

Warns people when the mics are 'Live'

Speakers & Headphones

Essential tools for any budding DJ!

Myriad System

If the mixing desk is the heart of your studio, the Myriad system is definitely the brain! All the music, jingles, promos and recordings are stored on the system and Myriad helps you to arrange them in to programmes and present them as a radio show. Myriad also allows you to record shows and play them out again later.

Ideas & Resources

Radio is a fantastic medium for building confidence, developing speaking and listening skill and providing a safe and controlled environment for pupils to express their views. Here are just a few lesson ideas that schools have successfully used.

Lesson Ideas

- Writing & Creating Adverts & Jingles
- Design Advert Campaigns
- Cover Live Sporting Events
- Cover Historic Events
- Produce A Radio Play
- Record Revision Guides Or Tools
- Host Current Affairs Or Talk Shows

Radio Drama

You can download *Mystery At Spooky Hill* from our website. This free resource includes the script, notes and sound effects needed to produce the first scene from our original play.

Free Download

For more lesson ideas and free resources visit www.schoolradio.co.uk

Upgrade Options

Please note that not all upgrade options are available for all studio packages

Audio Levelling & Processing

Audio levelling technology is used to correct audio that is too quiet or too loud to produce a more consistent and professional audio output. Audio processing takes it a step further by actually altering the audio to make it sound more appealing. Audio levelling & processing is highly recommended for inexperienced broadcasters.

Entry Level

This entry level system performs audio levelling and limiting and comes complete with cables and security guard.

From £159+VAT

Medium Level

The Podblaster delivers tamper free, professional audio levelling and limiting.

Includes cables

From £495+VAT

Professional Level

The DSPX-Mini provides professional audio levelling and audio processing for outstanding results.

From £1200+VAT

Portable Recording

Record interviews and 'live' events anywhere and as they happen with this handy portable recorder. From field trips to 'away game' coverage, the H1 adds a new dimension to your radio station.

Package includes H1, 2GB memory card, wind shield, tripod stand, mains adaptor, padded shell case & mic clip adapter.

Package From £90+VAT

Speaker Installations

In addition to installing your School Radio package, we can also install a new speaker system in your school to allow your 'broadcasts' to be heard in key areas such as dining halls, corridors and common areas. We can even fit external speakers outside to allow students to listen in your playground.

Rather than using traditional speaker wiring techniques, our system 'streams' audio from your radio studio to speakers around the school using your existing wired computer network. This means that we can install a speaker anywhere where there is a wired network point.

Speaker installation packages are bespoke and designed to meet your needs. For more information and a quote please contact our sales team at sales@schoolradio.co.uk

DIY Sound Deadening Package

Our range of acoustic tile packages are designed to complete your radio studio's aesthetic look and improve the acoustic properties of the room. It is not practical to soundproof most environments but using acoustic tiles to 'deaden' sound reflections in a room can dramatically improve the sound of any radio station.

Our pre-configured sound deadening packages can be DIY fitted or professionally installed by our engineers. We offer a range of packages to suit rooms of different types and sizes.

Package Prices From £400_{+VAT}

Music Download Service

Our music download service provides a safe, legal source of music from all genres and eras, for a small monthly subscription fee. This service provides access to the complete 'I Like Music' database which includes every UK top 40 hit since the chart started in 1952 and most US 100 Bill Board hits for the same period, so whether you need some Elvis or the latest N-DUBZ, you can be sure you will have it in minutes.

In Partnership With

- Search and download from more than a million songs
- All songs are top quality, uncompressed WAV files
- Download up to 50 new tracks each month for £25_{+VAT}
- Pay annually and get an extra 60 downloads free

Music downloaded from this service is intended for use on your radio station only. You will still need to obtain the necessary PPL and PRS licenses for any type of web, speaker or FM/AM broadcast. Service only available to educational establishment.

Professional Jingle Package

Why not consider giving your School Radio station that professional edge with a professionally produced jingle package? Our School Radio Jingle Packages include eight complete jingles, voiced and produced using your school or stations name.

Packages are produced by one of the UK's leading professional production houses. Jingles are provided on an 'outright purchase' basis which means that you can use them for as long as you wish without having to pay any ongoing fees (which is the normal way things are done!)

Completed 8 x Custom Jingles Package From £175_{+VAT}

Web Radio Hosting

All of our School Radio packages come with a 12 month web radio streaming package. After the initial 12 months we can offer a range of reliable and cost effective streaming packages starting from just £30_{+VAT} a month.

Our UK based streaming platform supports both WMA and Mp3 streaming and can be scaled to meet your budget and broadcast needs. In addition, we can also offer competitive podcast hosting and are happy to offer friendly advice for all your streaming needs.

Celebrating 15 Years Of School Radio

Why Radio?

- Communication is essential to learning.
- Speaking and listening skills are essential to learning.
- Communication through speaking and listening are fundamental to radio.

Radio is a medium that can enthuse children of all ages and abilities. It is great for building confidence, developing communication skills and has a wide range of applications across the curriculum. Plus it is great fun!

Useful Contacts

Setting up a new radio project or even expanding an existing station can be a daunting prospect. We at P Squared are happy to offer advice and guidance but we can't have all the answers so you may also find the websites below useful:
